

Growth and Innovation Support from European Digital Innovation Hubs

The Finnish EDIH Network in a Nutshell

European
Digital Innovation
Hubs Network

Co-funded by
the European Union

What is EDIH Network?

A pan-European partnership of over 150 European Digital Innovation Hubs (EDIHs).

There are four EDIHs in Finland. Some support businesses only, others also support the public sector.

An overarching goal of the EDIH network is the development of the digital maturity of businesses. The aim is to:

- develop the digital capabilities of SMEs and public sector organisations in all Member States of the European Union,
- increase innovation capacity in the European Union,
- provide permanent action and support for the development of digitalisation.

Co-funded by the European Commission's Digital Europe Programme with a budget of €7.5 billion. [Read more](#)

In Finland, the project is co-funded by Business Finland.
